Tree Moss Concrete

树苔浸膏

Tree Moss Concrete is a natural, waxy extract with a characteristic mossy-green and dry woody odour, used in fine perfumery to add depth, earthiness and a classic chypre-fougère character as a long-lasting base note and fixative.

ODOWELL

Tree Moss Concrete Brochure

Name: Tree Moss Concrete
Source: Natural extract from tree moss
CAS: 9000-50-4
Appearance: Dark green to brownish, waxy concrete

Key Applications

Classic mossy-green and woody base note for fine fragrances, especially in chypre, fougère and woody accords.

Adds depth, natural earthiness and a slightly salty, forest-floor effect to masculine and unisex compositions.

Used in high-end perfumery, niche fragrances and artisan creations seeking a traditional “ moss ” character.

Product Advantage

Characteristic tree-moss profile with cool green, lichen-like facets and dry woody undertones. Excellent fixative effect, enhancing persistence and complexity of floral, woody and amber bases. Provides naturalistic nuances that are difficult to achieve with purely synthetic materials, enriching overall olfactive texture.

Recommended Usage Levels

Fine perfumery	0.1% – 5.0%
Niche / extrait concentrations	0.5% – 8.0%
Experimental bases & accords	0.2% – 10.0%

Packaging and Storage

Packaging: 5 kg / 20 kg containers
Storage: Store tightly closed in a cool, dry, well-ventilated place, away from heat and direct sunlight.
Shelf life: Typically 2 years under recommended storage conditions.
